VOTING RIGHTS AND CITIZENSHIP
CURRICULUM GUIDE FOR GRADE 11

A NEW DOCUMENT-BASED CURRICULUM USING PRIMARY SOURCES AND TODAY’S NEW YORK TIMES,
DESIGNED TO PREPARE STUDENTS FOR THE NEW YORK STATE UNITED STATES HISTORY AND
GOVERNMENT EXAM

VOTING IS POWER

The common understanding is that the United States was founded on democratic principles which were the reigning idea of the American Revolution. The reality is more complex. For most leaders of the American Revolution, direct democracy or direct participation of citizens in government was a radical idea that threatened the stability and order of society. Most leaders preferred a republican form of democracy, which is based on representation through elected officials. Moreover, many leaders assumed that certain groups would not be allowed to vote, including women, slaves and men without property. In 1790, the year after the U.S. Constitution went into effect, ten states required property ownership to vote, and 1/6 of the nation’s population were African-American slaves who also could not vote.

Why did those with power fear democracy and prevent members of certain groups from voting? And why did people struggle to gain this right? Voting is about power. People without the vote have no say over how they are governed and are easily oppressed by individuals with power.

Voting is a right today, but it was won only through struggles in which many people risked and, in some cases, lost their lives. It is a right which can never be taken for granted.
